## Problem of the Week 19

**Problem: The 2006 winter Olympics was held in Torino, Italy. The Olympians from Germany received the most medals at the Olympic games with a total of 29 medals. Russia won exactly twice as many medals as host country Italy. The U.S. won two less than three times the number of medals won by France. Italy won two more medals than France. The United States ended the Olympics with the second most medals, having four less than Germany. How medals did each country receive?**
